Click on 2-Step Verification

Password & sign-in method

Your password protects your account. You can also add a second layer of protection with 2-Step Verification, which sends a single-use code to your phone for you to enter when you sign in. So even if somebody manages to steal your password, it is not enough to get into your account.

Note: To change these settings, you will need to confirm your password.

Password Last changed: 3 hours ago >

Protect your account with 2-Step Verification

Each time you sign in to your Google Account, you'll need your password and a verification code.

[Learn more](#)

Add an extra layer of security

Enter your password and a unique verification code that's sent to your phone.

Keep the bad guys out

Even if someone else gets your password, it won't be enough to sign in to your account.

GET STARTED

In just three steps - you will enhance security protections for your account!

Google

One account. All of Google.

Google

Verify it's you

There's something unusual about how you're signing in. To show that it's really you, complete the task below.

Confirm the phone number you provided in your security settings. (***-***-12)

Enter phone number

Done

[Try another way to sign in](#)

Google

Verify it's you

There's something unusual about how you're signing in. To show that it's really you, complete the task below.

Enter a verification code

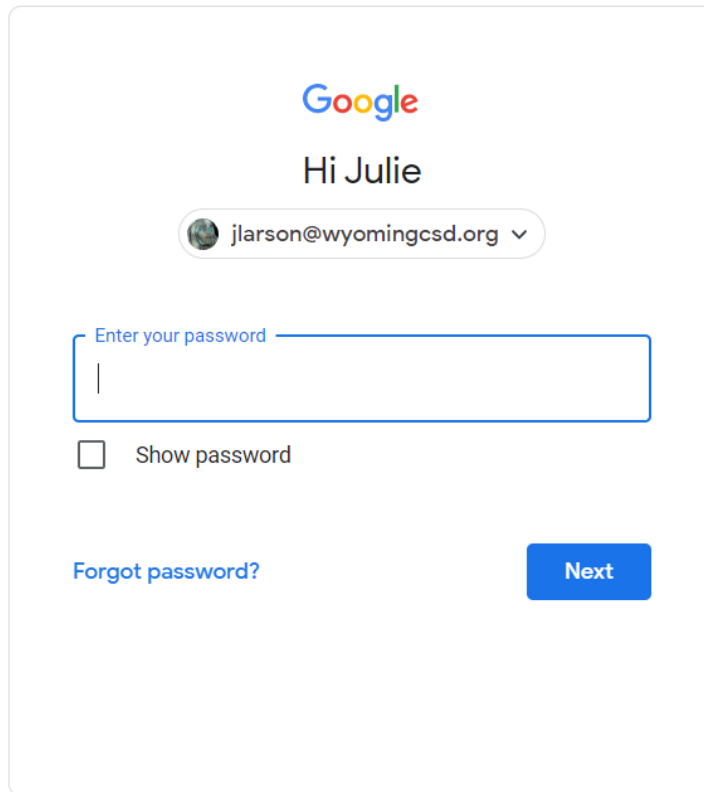

A text message with a verification code was just sent to (***-***-12)

G- Enter the 6-digit code

Done

Don't ask again on this computer

You will be prompted to enter your Wyoming email password, then click next

The image shows a Google login interface. At the top is the Google logo. Below it, the text "Hi Julie" is displayed. Underneath is a dropdown menu showing the email address "jlarson@wyomingcsd.org" with a downward arrow. Below the email is a password input field with the placeholder text "Enter your password" and a vertical cursor. To the right of the input field is a checkbox labeled "Show password". At the bottom left is a link "Forgot password?". At the bottom right is a blue button labeled "Next".

You will now decide how you would like to receive the codes for signing into your account. If you have a smart phone or a phone that accepts text messages, then the recommended method would be Text message. You will need to enter the phone number you wish to use and then click next.

Let's set up your phone

What phone number do you want to use?

A red arrow points to the text input field.

Google will only use this number for account security.
Don't use a Google Voice number.
Message and data rates may apply.

How do you want to get codes?

Text message Phone call

Step 1 of 3

 [NEXT](#)

You will receive a text message from Google with a 5 digit code, enter the code into the box provided

Confirm that it works

Google just sent a text message with a verification code to (240) 298-5748.

Enter the code

Didn't get it? [Resend](#)

[BACK](#)

Step 2 of 3

[NEXT](#)

Once the code has been sent and Google is able to verify your code, you will see the following, click on Turn On

It worked! Turn on 2-Step Verification?

Now that you've seen how it works, do you want to turn on 2-Step Verification for your Google Account pduser@smcm.edu?

Step 3 of 3

TURN ON

Congratulations, you have successfully turned on 2-step verification. If you would like to continue to receive text message's as your method of verification, you do not need to do anything further. That being said, there are other options available to those who have a smart phone. Those options are explained below

Add Google Prompt—Click Add Google prompt, enter your cell phone number and each time you log in to your email, you will receive a prompt on your phone. A few things to note:

- A data connection is required to use Google prompt.
- users with iOS devices will need to install the [Google app](#) in order to use Google prompt.

Authenticator App—download and install the Google Authenticator app on your android or i-phone

- Under "Authenticator app," click **Set up**.
- Open the Google Authenticator application. If this is the first time you've used Authenticator, tap **Begin setup**. To add a new account, in the bottom right, tap **Add** .
- To link your mobile device to your account: **Using Barcode:** Tap "Scan Barcode" and then point your camera at the QR code on your computer screen.
- **Using Manual Entry:** Tap "Manual Entry" and enter the email address of your Google Account. Then, enter the secret key on your computer screen into the box under "Key". Next, turn on **Time Based** and tap **Done**

To test that the application is working, enter the verification code on your mobile device into the box on your computer under **Enter code**, then click **Verify**. The clock icon on your mobile device will let you know how much time is left before the verification code expires and a new one is generated.

If your code is correct, you will see a confirmation message. Click **Done** to confirm. If your code is incorrect, try generating a new verification code on your mobile device, then entering it on your compute

Backup Codes

These printable one-time passcodes allow you to sign in when away from your phone, like when you're traveling. Click on setup and a list will appear. If you print out this list, put it in a secure location.

Backup Phone

You can add a backup phone for added security.
